

The Business of Cleaning

Want to improve your business?

Ask Yourself...

- Why are you cleaning?
- How are you cleaning?

Why?

- Because it is a healthy choice, a safety issue, makes business and economic sense and it's the law.
 - It's Healthy – Cleaning controls the growth of unwanted bacteria in food and on surfaces. Bacteria can make people sick.
 - It's Safer – A clean and sanitised workplace is safer for everybody. Effective cleaning and sanitising controls the growth of unwanted bacteria in food and on surfaces. Unclean surfaces cause accidents. Prevention is the cure.
 - It makes Business sense – Your infrastructure will last longer and work more efficiently if cleaned regularly and properly. You will enjoy customer confidence.
 - It makes Economic sense – Your insurance premiums are kept down. Your staff experience fewer sick days. Your customers come back.
 - It's the law – The Australian and New Zealand Standards Food Code is compulsory in all States and Territories in Australia. Environmental Health Officers are employed by local councils and the Department of Health to make sure you comply with it.

How?

- By using the best.
 - Just about everything needs cleaning, sometimes daily, sometimes weekly and sometimes once a year. You need a systematic approach.
 - Arm yourself with the THINK ST SOLUTIONS Cleaning RESOURCE KIT. It takes you through a step by step process that lets you professionally assess your business needs and develop strategies to establish and maintain the very best cleaning outcomes possible, every day, every year, every time. Your business will shine.
